

PM Eleven

PM Eleven is committed to delivering quality SAP embedded and SAP integrated solutions applicable for the asset intensive market. PM Eleven is renowned for its SAP solutions that significantly boost productivity and efficiency, enabling better business decisions.

Asset Management

Advocates (AMA)

Every organization needs an advocate. AMA provides comprehensive education and consulting services, from an advocate's perspective, through

- Building Strengths and competencies of the clients core team
- Empowering the Team to gain clarity on the path of results-driven asset management, and
- Delivering Deep System Knowledge.

Reliability Dynamics

Reliability Dynamics is an engineering and technology company specializing in equipment reliability and maintenance solutions for corporate software. Reliability Dynamics deliver a revolutionary solution that enables customers to obtain and leverage high-quality equipment failure data to optimize their facilities.

News by PM Eleven & AMA / Jan 12, 2026

PM Eleven Pty Ltd and Asset Management Advocates, LLC. are pleased to announce a strategic partnership with US based Reliability Dynamics LLC

- [AMA](#) and [PM Eleven](#) will jointly leverage [Reliability Dynamics'](#) ISO 14224-conformant [Industry Solution for Plant Maintenance \(ISPM\) solution for SAP](#), enabling asset-intensive organizations to adopt industry-aligned reliability and maintenance data standards within their SAP environments

ISPM Solution - making equipment reliability data high-quality.

By combining Reliability Dynamics' deep reliability engineering expertise and proven ISPM solution with AMA and PM Eleven's extensive SAP EAM domain knowledge and global delivery capabilities, we will provide customers with a scalable, best-practice approach to improving asset data quality, performance analytics, and reliability outcomes.

Together, AMA and PM Eleven will serve as a global resource for the deployment, enablement, and ongoing adoption of Reliability Dynamics' ISPM solution— helping organizations accelerate value realization and build a stronger foundation for reliability, asset performance, and continuous improvement.

Reliability Dynamic's SAP certified ISPM solution delivers methods which are ISO14224 conformant allowing customers to pursue high-quality data to reduce operational risk and increase production throughput and profitability.

ISPM uniquely addresses reliability data issues for customers through:

- Clarity in technical Asset hierarchy structuring
- Standardising data collection reinforcing high-quality reliability data
- enabling corporate visibility of equipment performance data, e.g., failure events versus consequences, with the ability to drill-down to underlying issues.

We look forward to leveraging our combined expertise to bring enhanced value and success to our asset intensive customers.
